

JAIHO PROFILE

About Jaaiho

Jaaiho is a global information technology company with 25 years of proven IT experience, world-class credentials and a wide range of technology expertise.

Client-Focused Approach

Collaboration is the foundation of our engagement approach. We start by listening and learning about your business, its operations, systems and goals. With that knowledge we work to anticipate your needs and tailor our approach and solutions to meet them.

Results-Driven Performance

At Jaaiho, we measure success the same way you do: by results. We deliver solutions precisely configured to produce your target outcomes and deliver tangible business value. We keep our commitments, and help you keep yours by completing work on time and on budget. As one closely aligned team, we succeed together. That's how we transform client engagements into lasting partnerships. And that is why Jaaiho's first client is still a client and will always be a client.

Expertise and Capabilities

With a team of professionals over 500, Jaaiho has the business acumen, technical expertise and consulting experience to support your business and supplement its IT resources. The average Jaaiho consultant has worked in the industry for 15 years, developing strong technical capabilities and meaningful industry knowledge.
